

GOVERNMENT OF GOA

A REPORT ON

RURAL WAGES

2014-15 and 2015-16

DIRECTORATE OF PLANNING, STATISTICS & EVALUATION

PORVORIM – GOA.

P R E F A C E

The Directorate of Planning, Statistics and Evaluation (DPSE) has been bringing out a brochure on “Rural Wages” annually, since 1975-76. The present brochure which is the 33rd in the series of this publication incorporates the data relating to the agricultural years 2014-15 and 2015-16 (July to June). It presents, as usual, the data on wages paid to workers engaged in various agricultural and non-agricultural operations in the State of Goa. The data on rural wages presented in this brochure is based on the information collected from four selected sample villages of each taluka of the State for different occupations. Taluka-wise and operation-wise data on wage payment presented in this report for workers engaged in various operations has been collected by village level Revenue Staff and the Block Level Statistical Assistants who constitute the Primary Reporting Agency.

The data presented in this publication broadly indicates the wage pattern prevalent in the rural areas of the State of Goa and the respective trend of changes over a period of time. It is hoped that this publication will prove as a useful reference for the study of wage patterns prevailing in the rural areas of the State.

Considering the limitations, it is the endeavor of this Directorate to reduce the time lag in making available the results at the earliest.

Suggestions for improvement in the contents and quality of this publication are most welcome.

Dr. Y. Durga Prasad
Director

Place: Porvorim-Goa.
Date: October, 2018.

Detailed Statistical Tables	11-20

INTRODUCTION

Rural wages data has vital significance in terms of planned development of agricultural/rural sectors engaged in various related operations, skilled or unskilled. This data is also essential for carrying out cost of cultivation studies for studying economic pattern of different crops, given the fact that Agriculture is one of the primary and important activities of the State, contributing about 4% of the State's income. People residing mainly in the rural parts of Goa thrive on agricultural activities such as crop cultivation, plantation, ploughing, threshing, weeding, tilling etc. for earning their daily livelihood.

Minimum wage is the pillar of Human Development Index and availability of reliable information on wages as well as a study of the prevailing rural wages is all the more necessary for the purpose of effective enforcement of the Minimum Wages Act, 1948, which provides the basis for fixation and periodical revision of minimum wage rates in agriculture and other employments in the unorganized sector in the rural areas with a view to ensure up-liftment of the poorer sections of the society. In view of the above, the Directorate of Planning, Statistics and Evaluation has been collecting, compiling and bringing out a report regularly on rural wages in terms of spatial and temporal variations covering agricultural and some of the rural based non-agricultural operations.

Scope and Coverage

The State of Goa comprises of 2 districts viz. North Goa district and South Goa district made up of 12 talukas. The data on rural wages presented in this report is collected from 4 sample villages from each of the 12 talukas. The data is scrutinized, compiled and the results are presented in this report. District/Taluka-wise and operation-wise data on average daily wages, separately for adult male/female workers is presented for various agricultural and non-agricultural operations, for the agricultural years July 2014 to June 2015 and July 2015 to June 2016. The list of the selected 48 villages from the 12 talukas in the two districts of the State is presented in *Annexure I*.

Tables I and II present the data on daily wages of agricultural labourers engaged in activities connected with cultivation of field crops. Tables IV and V present similar data for plantation crops such as coconut, arecanut, cashew nut etc. Table VI represents the average daily wages for plantation activities. Details of wages of skilled workers mainly comprising artisans like blacksmith, bamboo and cane workers, carpenter, mason, potter, stone cutter etc. and for unskilled workers such as cattle grazers/cowherds, casual labour etc. data for plantation activities are presented in tables VII and VIII respectively for the years 2014-15 and 2015-16.

Findings

1. Agricultural Activities

1. (a) Field Crops

The taluka-wise distribution of average daily wages earned by male and female labourers for agricultural/field crop activities during the years 2014-15 and 2015-16 are given in tables I and II.

The study of prevailing wages indicates that the average daily wages commanded by agricultural labourers for field crops during the year 2014-15 and 2015-16 ranged between Rs.415/- to Rs.522/- and between Rs.440/- to Rs.559/- respectively for all activities in case of male workers. Similarly, in case of female workers, the wages ranged from Rs.293/- to Rs.323/- and Rs.313/- to Rs.360/- respectively for the same period as can be seen in tables I and II.

The daily wages commanded by male labourers during both the years in almost all the activities in Salceta taluka were higher as compared to the other talukas in the State. As far as agricultural operations are concerned, during both the years 2014-15 and 2015-16, the average daily wages for male labourers were predominantly higher in Sanguem taluka for ploughing in particular, the maximum being Rs.683/- and Rs.733/- for the respective years and the lowest being Rs.379/- in Bardez taluka for 2014-15 and Rs.463/- in Sattari taluka for 2015-16 respectively.

The average daily wages of agricultural labourers (male and female) for field crop activities prevalent in Goa during the years 2014-15 and 2015-16 ranged from Rs.293/- to Rs.522/- and from Rs.313/- to Rs.559/- respectively.

Daily average wages prevailing in South Goa district were higher as compared to North Goa district for both the years i.e. 2014-15 and 2015-16 with Salcete taluka commanding the highest wages and Pernem taluka paying the lowest wages.

Table 'III' depicts the district-wise and sex-wise distribution of average daily wages for agricultural/field crop activities with percentage growth rate during the years 2014-15 and 2015-16.

It can be seen from the table that district-wise distribution of average daily wages prevailing in South Goa district are higher as compared to North Goa district for both the years i.e. 2014-15 and 2015-16, especially for male workers except in the case of activities such as weeding, manuring, transplanting, irrigation and general agriculture work, where the wages show a fluctuating trend. The overall percentage growth rate during 2015-16 over that of 2014-15 depicts an increasing trend in the wages charged for most of the activities. However, the overall percentage growth in wages earned by female workers is comparably higher to that of male workers during 2015-16 in almost all the activities.

1(b). Plantation Crops

Tables IV and V depict the taluka-wise average wages of agricultural labourers engaged in plantation crops in the State during the years 2014-15 and 2015-16 respectively.

A study of the prevailing wages indicated that the average daily wages for all plantation activities for male workers ranged between Rs.433/- to Rs.729/- and between Rs.470/- to Rs.759/- during the years 2014-15 and 2015-16 respectively.

Similarly, in case of female workers, the wages ranged from Rs.270/- to Rs.326/- and Rs.306/- to Rs.382/- respectively for the same period under reference.

The average daily wages of agricultural labourers (male and female) for plantation crop activities prevalent in Goa during the years 2014-15 and 2015-16 ranged from Rs.270/- to Rs.729/- and from Rs.306/- to Rs.759/- respectively.

As can be seen from tables IV and V, coconut harvesting and arecanut harvesting commanded highest wages of Rs.991/- and Rs.1000/- in Darbandora taluka during both the years i.e. 2014-15 and 2015-16 respectively for men, whereas digging of pits commanded the lowest wages of Rs.338/- and Rs.350/- for men in Pernem taluka during the years 2014-15 and 2015-16 respectively.

With respect to women labourers, it is observed that average wages earned in 2014-15 by women were highest at Rs.417/- for de-husking coconut and arecanut in Sanguem taluka while during 2015-16, the maximum wages paid to women were Rs.470/- in Bicholim taluka for cashew apple and nut collection. In 2014-15, digging of pits and nira extraction in Pernem taluka commanded minimum wages of Rs.217/-, whereas during 2015-16, the minimum wages paid to women for almost all plantation crop activities like nira extraction, de-husking coconut and arecanut etc. were Rs.250/- in Dharbandora taluka.

The analysis of the plantation activities within the districts of North Goa and South Goa exhibit that the average wages paid in South Goa district are comparably higher for all labourers, male as well as female during 2014-15 and 2015-16 subject to a few exceptions.

Table VI, analyses the district-wise and sex-wise distribution of average daily wages for all plantation activities during the years 2014-15 and 2015-16 and the

percentage growth rate in wages over the previous year. It may be seen from the table that except for arecanut harvesting, the average wages commanded by male labourers employed in all other plantation activities in South Goa district were higher than North Goa district, the highest wage being Rs.667/- and Rs.716/- for coconut harvesting during 2014-15 and 2015-16 respectively. Whereas in North Goa district, male labourers earned maximum average wages of Rs.810/- and Rs.830/- for arecanut harvesting during 2014-15 and 2015-16 respectively.

The average wages paid to female labourers employed in all other plantation activities in both the districts i.e. North Goa and South Goa portrayed an uneven trend during the years 2014-15 and 2015-16. However, female labourers in North Goa district earned more than their counterparts in South Goa district in cashew apple & nut collection and coconut de-husking activities during both the years at Rs.345/- and Rs.351/- during 2014-15 and Rs.359/- and Rs.375/- during 2015-16 respectively.

2. Skilled and Unskilled Workers other than Agricultural Labourers

Non-agricultural skilled activities such as carpentry, blacksmith and masonry etc. and unskilled activities such as cattle grazing, laundry, casual labour in construction and other activities are also considered for collection of rural wages. The taluka wise distribution for the year 2014-15 and 2015-16 are given in tables VII and VIII respectively.

Amongst the skilled male workers engaged in non-agricultural operations in rural areas, the average daily wages varied between Rs.325/- to Rs.980/- and Rs.300/- to Rs.1080/- for different talukas and different occupations during the years 2014-15 and 2015-16 respectively. Conversely, for their female counterparts, the average daily wages ranged between Rs.250/- to Rs.400/- and Rs.314/- to Rs.400/- for 2014-15 and 2015-16 respectively.

Carpentry demanded the highest average wages during 2014-15 and 2015-16 in Dharbandora taluka (Rs.980/- and Rs.1080/- respectively, while the lowest reported average wages were for non-categorized skilled labour in Bardez taluka (Rs.325/-) for 2014-15 and Salcete taluka (Rs.300/-) for 2015-16. During the year 2014-15, the average wages reported for skilled female workers engaged in Bamboo and Cane work were highest in Sanguem taluka at Rs.400/- and lowest at Rs.250/- in Mormugao taluka for pottery.

In 2015-16, female labourers engaged in non-categorized skilled labour in Pernem taluka earned maximum average wages of Rs.400/- while the minimum average wages were reported in Ponda taluka for Bamboo & Cane work and weaving (Rs.314/-).

The average daily wages for unskilled male workers varied between Rs.195/- to Rs.650/- and Rs.321/- to Rs.650/- for different talukas and different occupations during the years 2014-15 and 2015-16 respectively. Conversely, for their female counterparts, the average daily wages ranged between Rs.195/- to Rs.500/- and Rs.206/- to Rs.500/- for 2014-15 and 2015-16 respectively. Washer-men and casual labour demanded the highest average wages in Canacona taluka during the years 2014-15 and 2015-16 respectively (Rs.650/-), while the lowest average wages paid were for cattle-grazing and washer-men in Ponda taluka (Rs.281/-) during 2014-15 and Sanguem and Salcete talukas (Rs.300/- for cattle grazing) in 2015-16.

During the years 2014-15 and 2015-16, the average wages reported for unskilled female workers engaged in laundry/washer-women were highest in Canacona taluka at Rs.500/-. During the year 2014-15, the lowest average wages for female workers were Rs.195/- in Bardez taluka for non-categorized unskilled labour and Rs.206/- for cattle-grazing in Sanguem taluka during 2015-16.

On the whole, the average daily wages of skilled workers engaged in non-agricultural activities in Goa ranged from Rs.297/- to Rs.628/- during the year 2014-15 and from Rs.363/- to Rs.686/- for the year 2015-16 respectively. Similarly, the average daily wages of unskilled workers engaged in non-agricultural activities in Goa for the year 2014-15 ranged from Rs.250/- to Rs.474/- whereas during 2015-16 the figures ranged from Rs.291/- to Rs.491/- respectively.

Table IX and X represents the district-wise and sex-wise average wages and the growth during 2015-16 over 2014-15 for all workers employed in non-agricultural activities either skilled or unskilled. As portrayed in the table, during both the years, 2014-15 and 2015-16, in South Goa district, male workers in the skilled category of carpentry, masonry, stone cutting, blacksmith and cane work as well as those engaged in unskilled work like laundry, casual labour had an edge over the wages paid in the North Goa district. However, the wage rate prevailing in North Goa district for labour employed in pottery, weaving and cattle grazing was comparatively higher than the wage rate in South Goa district.

In the women's category, those engaged in pottery, weaving and cane & bamboo work, had higher wages in North Goa district than in South Goa district. However, for unskilled labour like laundry and cattle grazing, the wages were better in South Goa district.

3. Percentage Growth Rate...

3(a). Field Crops

The overall percentage growth in wages earned by male labourers in field crop activities was 9.64 % and 5.64% during the year 2015-16 over the year 2014-15 in North Goa and South Goa districts respectively. Whereas conversely, it was 11.72% and 7.74% for female labourers during the same period for North Goa and South Goa districts respectively. For the State as a whole, the percentage growth of wages for workers involved in field crop activities (male and female) for the year 2015-16 was about 8.54% only over the year 2014-15.

3(b). Plantation Crops

The overall percentage growth in wages earned by male labourers in plantation activities was 7.03 % and 7.46% during the year 2015-16 over the year 2014-15 in North Goa and South Goa respectively. Whereas conversely, it was 11.25% and 9.32% for female labourers during the same period for North Goa and South Goa respectively. For the State as a whole, the percentage growth of wages for workers involved in plantation activities (male and female) for the year 2015-16 was about 8.32% only over the year 2014-15.

4. Skilled and Unskilled Labour other than Agricultural Labour

4(a). Skilled Workers

The overall percentage growth in wages earned by male skilled workers engaged in non-agricultural activities was 6.64 % and 11.44% during the year 2015-16 over the year 2014-15 in North Goa and South Goa districts respectively. Whereas conversely, it was 16.52% and 8.97% for female workers during the same period for North Goa and South Goa districts respectively.

4(b). Unskilled Workers

The overall percentage growth in wages earned by male unskilled workers engaged in non-agricultural activities was 7.27 % and 12.44% during the year 2015-16 over the year 2014-15 in North Goa and South Goa districts respectively. Whereas conversely, it was 12.64% and 18% for female workers during the same period for North Goa and South Goa districts respectively.
